Research Interests

graph machine learning, fairness, interpretability

Education

PhD in Computer Science; University of California, Los Angeles (2021-), Advisor: Yizhou Sun

BS in Computer Science; University of California, Los Angeles (2018-2021), GPA: 3.927, Summa Cum Laude

Work Experience

Researcher, UCLA Scalable Analytics Institute (2019-)

Location: Los Angeles, California

Description: Please consult Research Projects section below for further details.

Researcher, UCLA NLP (2020-)

Location: Los Angeles, California

Description: Please consult Research Projects section below for further details.

Software Engineering Intern, Snap, Inc. (2021)

Location: Los Angeles, California

Description: Machine learning for ads and monetization.

Research Engineering Intern, AllenNLP, Allen Institute for Artificial Intelligence (2021)

Location: Seattle, Washington

Description: Please consult Research Projects section below for further details.

Software Engineering Intern, Microsoft Corporation (2020)

Location: Sunnyvale, California

Description: I crafted a peer-to-peer-anonymous, secure backend technical design for a feature to report harassment on Microsoft Teams.

Software Engineering Intern, Get Heal, Inc. (2019)

Location: Los Angeles, California

Description: I engineered full-stack integrations of mechanisms used every day at Heal that enhance the automated routing of medical providers, like automated triaging, doctor-assistant match prevention, and phone number verification. I also adapted Heal's automated routing algorithm to optimally schedule telemedicine visits, which greatly benefits patients during the COVID-19 pandemic.

Deep Learning Engineer, Sike AI (2018-2019)

Location: Los Angeles, California

Description: I designed, implemented, and trained the in-house deep learning model for working style-analysis from video with TensorFlow.

2021 - [Introduction to Probabilistic Graphical Models](#), **UCLA Scalable Analytics Institute**

2020 - [Spectral Graph Sparsification](#), **UCLA Scalable Analytics Institute**

2020 - "[MONET: Debiasing Graph Embeddings via the Metadata-Orthogonal Training Unit](#)," **Microsoft Research Cambridge Paper Reading Group**

2020 - [Fair Machine Learning](#), **Microsoft Garage Brown-Bag**

2019 - [An Automated and Cost-Effective System for Early Antimicrobial Susceptibility Testing Using Optical Fibers and Deep Learning](#), **UCLA HHMI Day 2019**

Honors and Awards

2021 - [MLH Top 50 Class of 2021](#)

2021 - [UCLA Samueli School-Wide Outstanding Bachelor of Science](#)

2021 - [UCLA Chancellor's Service Award](#)

2021 - [UCLA Samueli Engineering Achievement Award in Student Welfare](#)

2021 - [Eugene V. Cota-Robles Fellowship](#), **UCLA**

2021 - [Graduate Research Assistantship](#), **UCLA**

2021 - [Boeing Company Scholarship](#), **UCLA**

2021 - [Brian J. Lewis Endowment](#), **UCLA**

2020 - [Computing Research Association Outstanding Undergraduate Researcher Honorable Mention](#)

2020 - [AAAI Undergraduate Consortium](#) (1 of 14 accepted out of 82 applicants)

2020 - [IBM Quantum Challenge](#) (1 of 574 winners out of 1745 participants)

2020 - [Out for Undergrad Tech Conference](#) (1 of 300 accepted applicants)

2020 - Google Queer Tech Voices Conference (1 of 32 accepted out of hundreds of applicants)
2019 - 3rd Place Award for Best Hack @ Rose Hack, Major League Hacking
2018-2021 - Dean's Honors List
2017 - Siemens Competition Regional Finalist (1 of 101 finalists selected from 4092 entrants)
2016 - Award of Achievement, Association for Computing Machinery, San Francisco Bay Area Professional Chapter

Research Projects

AllenNLP Fairness Library (2021)

Mentors: Akshita Bhagia, Evan Pete Walsh

Location: Allen Institute for Artificial Intelligence

Description: I developed [AllenNLP's fairness library](#), which makes fairness metrics, training-time fairness algorithms, bias mitigation algorithms, and bias metrics accessible to researchers and practitioners of all levels. I also wrote a [guide chapter](#), [documentation](#), and a [blog post](#) to communicate my work and make usage of the fairness library accessible.

Harms and Challenges Associated with Treatment of Non-Binary Gender in Language Technologies (2021-)

Research Mentors: Dr. Sunipa Dev, Professor Kai-Wei Chang

Location: UCLA NLP

Description: We study the representational and allocational harms of treating gender as binary in English language technologies, and the related challenges that need to be addressed. We do so via a survey of non-binary folks with familiarity with AI and our own experiments.

Expressive Graph Transformers (2020-)

Research Mentors: Professor Yizhou Sun

Location: UCLA Scalable Analytics Institute

Description: I'm empirically and theoretically studying the effect of different types of handcrafted and adaptive relational information for relation-aware self-attention on improving the expressiveness and performance of graph Transformers. As part of this project, I implemented and train a multi-GPU graph Transformer model using PyTorch.

Motif-Driven Contrastive Learning of Graph Representations (2020)

Research Mentors: Shichang Zhang, Ziniu Hu, Professor Yizhou Sun

Location: UCLA Scalable Analytics Institute

Description: We propose MICRO-Graph to: 1) pre-train Graph Neural Networks (GNNs) in a self-supervised manner to automatically extract graph motifs from large graph datasets; 2) leverage learned motifs to guide the contrastive learning of graph representations, which further benefit various graph downstream tasks.

Heterogeneous Graph Transformer (2019-2020)

Research Mentors: Ziniu Hu, Professor Yizhou Sun

Location: UCLA Scalable Analytics Institute

Description: I adapted the implementation of the Heterogeneous Graph Transformer (HGT) to efficiently embed web-scale knowledge graphs (e.g. YAGO, DBpedia) for link prediction and ran R-GCN baselines. Additionally, I prepared an OGB leaderboard submission in which I applied HGT to the ogbl-ppa dataset.

Automated, Cost-Effective Optical System for Accelerated Antimicrobial Susceptibility Testing (AST) Using Deep Learning (2018-2019)

Research Mentors: Calvin Brown, Professor Aydogan Ozcan

Location: UCLA Ozcan Research Group

Description: I designed a neural network that inexpensively and automatically detects bacterial resistance to antibiotics, which shortens the timeline of prescribing antibiotics to patients in resource-limited settings by about 60%, helping to mitigate the rise of global antimicrobial resistance. I implemented and trained the neural network with Python and Keras, tuning hyperparameters and visualizing learning curves, weights, and hidden-layer activations, achieving FDA essential agreement for 99.5% of drugs.

Estimating the Ages of FGK Dwarf Stars Through the Use of GALEX FUV Magnitudes (2017)

Research Mentors: Professor Graeme Smith, Sara Crandall

Location: University of California, Santa Cruz, Smith Lab

Description: I applied machine learning and statistics to discover a novel method for estimating the age of FGK dwarf stars using GALEX far-ultraviolet (FUV) magnitudes that is more cost and time-efficient, as well as more accessible, than existing methods.

An Empirical Characterization Of Internet Round-Trip Times (2016)

Research Mentor: Daniel S.F. Alves

Location: University of California, Santa Cruz, Internetworking Research Group (i-NRG)

Description: I applied machine learning to develop an RTT boundary prediction algorithm which employs online linear regression to predict future RTTs, thereby reducing unnecessary packet retransmissions, delays in retransmission, and overall network congestion.

Course Projects

Robust Model-Agnostic Meta-Learning for Binary Content Moderation Tasks in Natural Language Processing (2020)

Research Mentor: Professor Kai-Wei Chang

Location: University of California, Los Angeles

Description: We investigated applying Model-Agnostic Meta-Learning (MAML) to boost performance on binary content moderation tasks in low-resource contexts. Using PyTorch, we compared the ability of a model pre-trained with MAML to adapt to unseen binary content moderation tasks to those of a model pre-trained using traditional transfer learning approaches and a model trained from scratch.

Notes: [Report](#)

On the Complexity and Convergence of Approximate Policy Iteration Schemes (2020)

Research Mentor: Professor Lin Yang

Location: University of California, Los Angeles

Description: We surveyed relevant literature in approximate policy iteration, and provided theoretical proof sketches involved in the analysis of the complexity bounds, convergence guarantees, and rates of convergence for various approximate policy iteration algorithms.

Notes: [Report](#), [Poster](#)

Model-Agnostic Meta-Learning for a Policy Gradient Approach to MuJoCo Continuous Control Tasks (2020)

Research Mentor: Professor Jonathan Kao

Location: University of California, Los Angeles

Description: We investigated the adaptive power of Model Agnostic Meta-Learning on a policy gradient approach to MuJoCo continuous control tasks.

Notes: [Report](#)

Quantum Programming Algorithms (2020)

Research Mentor: Professor Jens Palsberg

Location: University of California, Los Angeles

Description: We implemented Deutsch-Jozsa, Bernstein-Vazirani, Grover's algorithm, and Simon's algorithm using PyQuil and Qiskit. We then evaluated the implementations and modern quantum compile and runtime capabilities using the Rigetti and IBM quantum simulators and IBMQX quantum devices.

Notes: [PyQuil Report](#), [Qiskit Report 1](#), [Qiskit Report 2](#)

MovieLens Recommender System (2019)

Research Mentors: Jyun-Yu Jiang, Professor Wei Wang

Location: University of California, Los Angeles

Description: We created a recommender system to predict the binary rating for 4M unseen UserID-MovieID pairs in the MovieLens dataset. We surveyed the performance of content-based (e.g. TF-IDF, genre-based decision tree, etc.) and collaborative filtering (e.g. SVM, SVD, element-wise matrix factorization, tabular matrix factorization, hybrid matrix factorization, etc.) methods. **We achieved the third highest ROC-AUC on the test set in our data mining class.**

Notes: [Report](#)

Service

Queer and Trans in STEM Representative, UCLA Samueli Standing Committee on Diversity

Core Organizer, Queer in AI (2021-)

Location: Virtual

Description: I organize socials and workshops at AI conferences (e.g. [AAAI-21](#), [ICML '21](#)), as well as the [undergraduate mentoring program](#), which gets junior queer and trans folks involved with AI research. Additionally, I advise AI conferences on [diversity and inclusion and accessibility issues](#). Finally, I meet weekly to discuss administrative issues. The work I do with Queer in AI has been featured by [500 Queer Scientists](#).

Organizer, UCLA Computer Science Summer Institute (2021)

Location: Los Angeles, California

Description: I recruited and interviewed diverse Undergraduate Tutors for the inaugural [UCLA Computer Science Summer Institute \(CSSI\)](#) to lead interactive coding and problem-solving sessions with the high school students for both the Introductory and Intermediate tracks. I am working with Professor Yizhou Sun and Professor Parvaneh Ghaforyfard to onboard the selected Undergraduate Tutors, organizing pedagogy and technical knowledge preparation sessions. Additionally, I advertised UCLA CSSI to ACM Teach LA at UCLA's partner schools, encouraging minoritized students to apply.

Outreach Director, ACM AI at UCLA (2019-2021)

Location: Los Angeles, California

Description: I strive to make an [AI education](#) accessible to everyone. I co-founded, led, and taught an open-source, accessible [machine learning and fairness course](#) at underserved schools in LA. I led the development of interactive, online learning modules (e.g. [gradient descent](#), [mean-squared error](#), [convolutional filters](#), biases in machine learning, etc.) I also created and produced the "You Belong in AI!" podcast, which empowers underrepresented youth to pursue AI opportunities through inspiring interviews with researchers. The podcast has been featured by the [Daily Bruin](#) and [UCLA Samueli Newsroom](#). Lastly, I organized events for diverse students to access AI research opportunities.

Co-Founder and Organizer, QWER Hacks (2019-2021)

Location: Los Angeles, California

Description: I co-founded and organized Major League Hacking's first-ever LGBTQIA+ event and the first student-run, collegiate [LGBTQIA+ hackathon](#) in the US. QWER Hacks has been featured by the [Daily Bruin](#) and the [UCLA Samueli Newsroom](#).

Undergraduate Learning Assistant (2018)

Location: Los Angeles, California

Description: I led weekly recitation sections of 20 students for the introductory computer science class (programming in C++), walking through practice problems and actively applying pedagogy techniques (e.g. open questioning, inclusion of all perspectives, etc.)

Coursework and Skills

Graduate-level Coursework: Fairness, Ethics, Accountability and Transparency in Natural Language Processing; Neural Networks and Deep Learning; Reinforcement Learning Theory and Applications; Adversarial Robustness in Machine Learning; Quantum Programming

Relevant Skills: Python, PyTorch, PyTorch Geometric, shell scripting, LaTeX
